Safety Disclaimer

The Publisher advises users that the information contained herein, is published as a guide only, to fishing spots & GPS Coordinates. The maps and GPS Coordinates must not be used for navigational purposes or as replacements for official charts including Naval Charts & Maritime Safety Queensland's Boating Safety Charts or its Beacon to Beacon Guide where available. A Navigation Aid to Navigation Aid track is shown to indicate which side of a Navigation Aid a vessel should pass on. Due to the nature of constantly shifting sand & silt build up in the areas covered within, this track is not to be relied upon. Navigation Aid placement may not keep pace with shifting sand & silt. Mariners are solely responsible to ensure there is sufficient water under keel throughout any waterway to ensure safe passage.

Bar Crossings

Bar crossings are dangerous & should not be attempted without local knowledge or by inexperienced Mariners. Contact your nearest VMR Group prior to any crossing.

See VMR Groups.

Aerial Photography

Aerial photo based maps contained herein have been computer merged & colour enhanced, and on some occasions may not represent the true geographical definition of the area. See Safety Disclaimer.

GPS Notes / Coordinates

Information is supplied from many sources & in good faith, but its accuracy cannot be verified. GPS marks should get you close to areas that appear to have been productive in the past. Sound widely around the seabed of the given mark in search of fish & structure. Distances between Coordinates were taken in a straight line. For fuel & time purposes the user of this information should chart a course making allowance for any detours required to avoid collision with any object. Skippers are solely responsible for all safety requirements of their Vessel & persons on board.

Important Note: Some areas within may be subject to seasonal or temporary closures in regards to fishing, crabbing & bait gathering etc. Check with your local Fisheries Office for closures & current bag & size limits. These may change from time to time.
