

ROPES FOR BOATS

Step 1

Step 2

Pass ropes under / over and around each other.

Step 3

Ensure that ropes pass underneath loop on right hand side and above loop on the left hand side or vice versa.

Step 4

Pull Tight.

Step 1

Tie off one end & throw rope over boat to other side. Run rope through final tie off point and form a loop in rope.

Step 2

Underneath loop gather up rope and double over say 200mm.

Step 3

Run doubled over rope through initial loop passing in front of the tied off end as shown.

Step 4

Run loose end of rope through loop formed by doubled over rope.

Step 5

Run loose end back through final tie off point, pull secure load and tie off.

Step 1

Form a loop in the rope making sure that the rope running away to the right of the loop crosses over the top

Step 2

Form a second loop identical to the first.

Step 3

Bring the two loops together and position the initial loop on top or in front of the second loop.

Step 4

Place loops over bollard or pole ensuring that the initial loop is at the top.

Step 5

Allow loops to settle as low as possible on bollard or pole and pull on long end of rope to fasten hitch.

ROPES FOR BOATS

Step 1

Pass rope around back of cleat and back over the top of itself.

Step 2

Pass back around one half of the cleat and then over top of cleat.

Step 3

Pass rope back underneath other half of cleat.

Step 4

Diagonally pass rope back over top of cleat. Form a underhand loop as shown and place over end of cleat.

Step 5

Pull short end of rope to secure.

Possibly the most useful knot for the boatie. Ideal for securing to jetty poles and bollards. Shouldn't let go. Simple to tie - Undoes easily.

Step 1

Run rope around bollard or pole.

Step 2

Form a loop in the long end of the rope.

Step 3

Run rope around bollard or pole and back through loop.

Step 4

Pass rope back underneath other half of cleat.

Step 5

Run short end back underneath of long end and then back through initial loop.

Step 6

Hold short end and pull on long end of rope to fasten knot.
